UPGRADE TO **ATTITUDE**

Assist / Slipper Clutch

The assist slipper clutch, contributes to reducing the operating load of the clutch lever and a slipper function that reduces rear wheel hopping which results in a smoother and comfortable ride.

LCD Meter with Gear Position Indicator

The smart display includes engine rpm and fuel level as well as a negative-outline gear position indicator – so you always know what gear you're in.

Showa SFF-BP USD Forks

Upgraded the front suspension for precision handling ability; 41mm Showa Separate Fork Function Big Piston (SFF-BP) USD forks offer superb bump absorption and front-end feel.

Single Cylinder DOHC Four Valve

Free-revving, and responsive, the single-cylinder DOHC four-valve engine pumps adrenaline at high rpm, with 20.3kW power. For improved control the six-speed gearbox gains an Assist/Slipper clutch.

Full LED Lighting

The evocative round headlight uses a dual bar light signature, upper for low beam and lower for high beam, while the taillight is razor-thin.

IMU and ABS Braking Control

Two-channel ABS modulates the braking, dynamically managed by an Inertial Measurement Unit (IMU) to ensure brake force is evenly distributed between the front and rear wheels, minimizing rear wheel lift.
