GS150R

RIDE WITH PRIDE

It's your turn to make heads turn – the Suzuki way. Ride the all new Suzuki GS150R. Higher style quotient with enviable power. Sportier new cowl and body graphics with super cool colour choices make it the most sought after set of two wheels on the road.

New Sporty Cowl

Bold and in vogue – the new sporty cowl of Suzuki GS150R is designed to grab eyeballs. It sits beautifully on the front and jazzes it up to make it look mightier and more dynamic!

Sizzling Smart Body Graphics

Embellished with sizzling hot artistic body graphics, the new Suzuki GS150R shimmers in its new avatar! No wonder, wherever it goes, this work of passion turns fleeting glances into envious stares!

Engine Design with SJCS

Hot looks complemented by a cool engine – equipped with SJCS (Suzuki Jet Cooling System), the new 150cc engine jets engine oil directly to the backside of the piston. This enhances the power output of the engine and accelerates the bike's performance in the low to mid range speed.

Digital Speedometer with Dual Modes

Suzuki GS150R has been pepped up with the never-before eco-mode-equipped engine rpm indicator. Inspired by the technologically advanced GSX-R, this super intelligent rpm indicator signals the rider about the optimum up-shift timings. So whether it is about an economical ride or a high adrenaline rush, the choice of two-mode (Eco & Power) function gives you the best of both worlds.

LED Tail Lamp and Integrated Rear Turn Signal

The new Suzuki GS150R is adorned with the sleek, stylish, streamlined aerodynamic shaped LED tail lamp and integrated rear turn signals. With the design borrowed from the international style icon GSX-R, these blinking beauties make the bike even more irresistible!

Overdrive 6th Gear

Engineered to flow with the wind, Suzuki GS150R comes with the unique 6th speed gear. For the free spirited aimless glider, it is a delight to ride this majestic machine owing to its effortless relaxed cruising!
