ALFA ROMEO 8C SPIDER

ALFA ROMEO 8C SPIDER

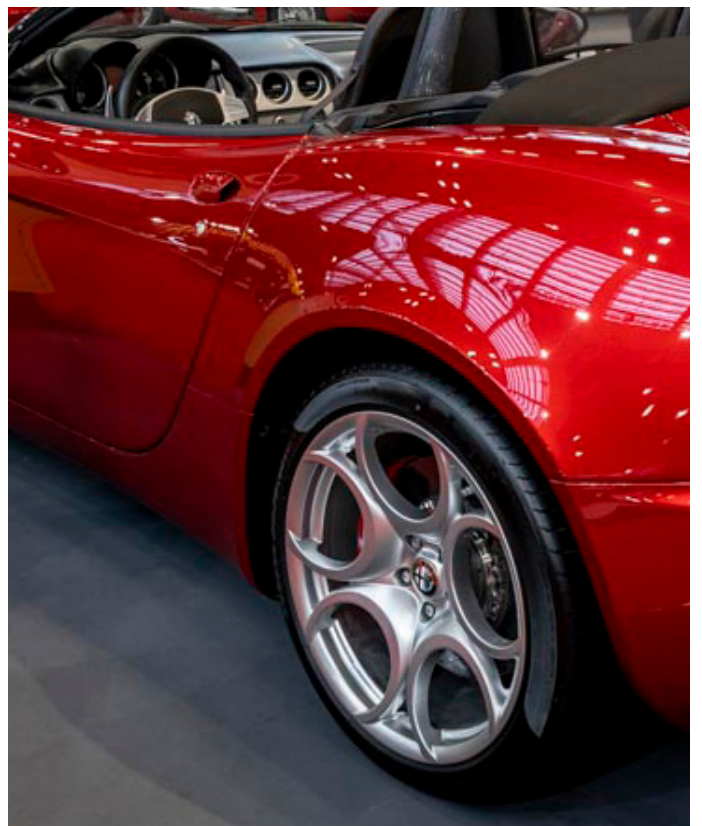

Convertible version of the alluring 2007 **Alfa Romeo 8C Competizione**, the 8C Spider was launched in 2009. It shares the same sophisticated mechanics as the hard-top Competizione, being powered by a 4.7-litre V8 delivering 450 HP paired with a six-speed robotised gearbox. A sports car with a racing heritage, the 8C Spider has a traditional Alfa Romeo transaxle layout with **front engine** and **gearbox and rear-wheel** drive for a perfect balancing of weights. Like the Competizione, just 500 were made. The car for sale - made in 2010 - has never left the company. It has only few kilometres on the clock and was thoroughly tested by the FCA Heritage expert team to be prepared to receive the **Alfa Romeo Classics Certificate of Authenticity**.
