

# V-Class

Mercedes-Benz

## As large as life.

The V-Class is thrilling at first glance – and after many thousands of kilometres, too. For families, business people and leisure adventurers as well as shuttle passengers. Thanks to its powerful exterior and the ergonomic, variable interior design, for example. Also, intelligent assistance and safety systems as well as the MBUX multimedia system fulfil the highest requirements. Just like the V-Class's drive system: its efficient, powerful engines and 9G-TRONIC automatic transmission turn every journey into an experience.

A detailed view of the front interior of a luxury car. The dashboard features a large, rectangular central touchscreen displaying a navigation and media interface. Below the screen are two horizontal rows of touch-sensitive controls. The steering wheel is made of dark leather with perforated sections and has multiple control buttons. The center console has a gear selector and handbrake. The interior is finished with dark leather and carbon fiber trim. The background shows a blurred view of trees outside the car.

## Quality Interior.

The high-quality interior of the V-Class will enrich your life with another favourite place. Enjoy the exclusive-looking cockpit with flawless design and a choice of premium-quality materials. The panoramic sliding sunroof treats you to even more light and air. And you can take the drinks to go with it either from the two temperature-controlled double cup holders or from the refrigerated compartment. Should you be driving late at night, the ambient lighting will provide an incomparably soothing mood with its atmospheric light.

## From size comes space.

Whether for the small joys of everyday life or simply for leisure, the V-Class is ready. With plenty of space and many good ideas for making variable use of the spacious interior. The separately opening rear window is a case in point. Its space-saving opening system and the load compartment shelf with two collapsible crates make loading and unloading child's play. The multiple and varied seat configurations and installation options of the V-Class also make it more than versatile enough to keep up with the needs of your children.

## Revolutionary infotainment: MBUX.

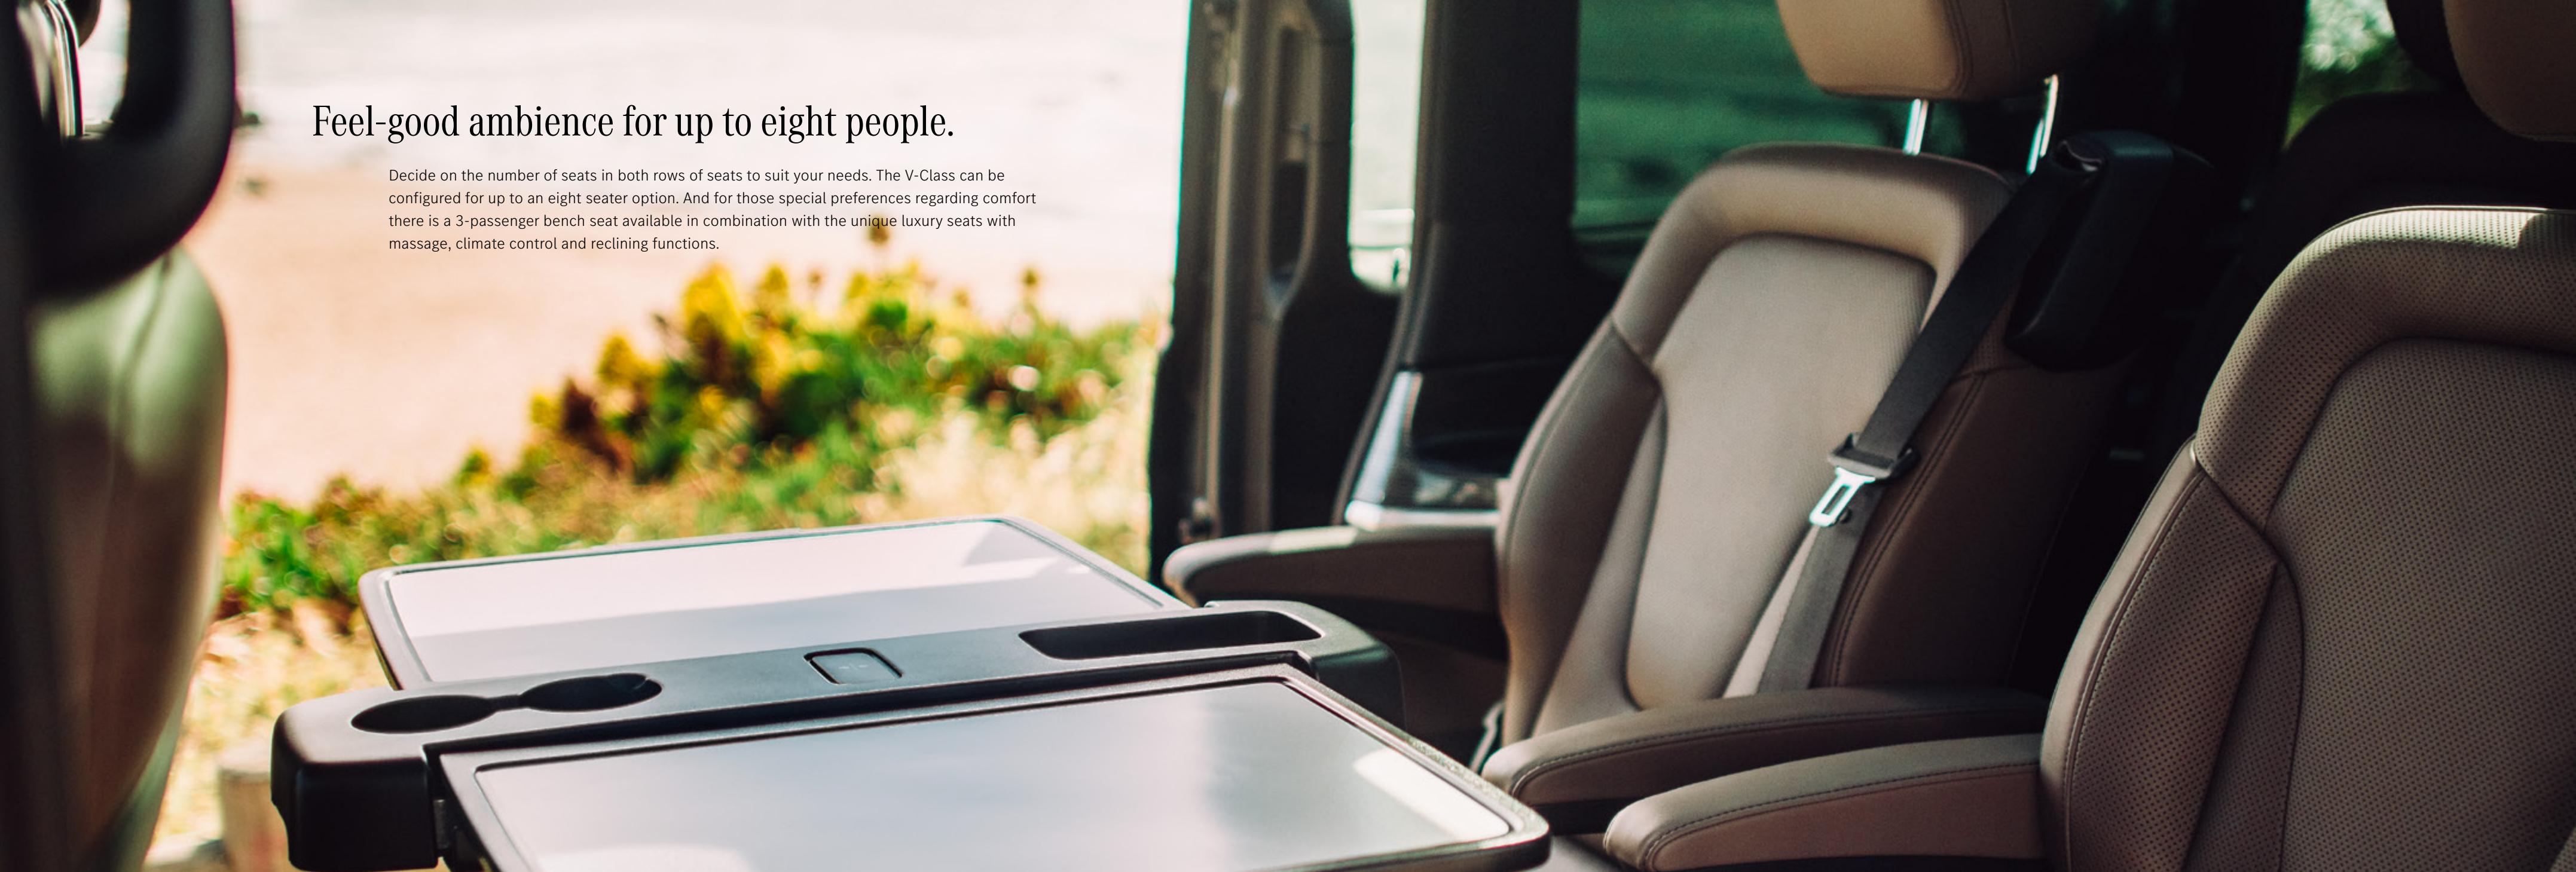

With MBUX, you will enjoy a multimedia system as standard which leaves virtually nothing to be desired. The modular system is operated intuitively and can be customised and extended for as many as 8 people: from intelligent voice control and smartphone integration to the Mercedes-Benz navigation system.

## Feel-good ambience for up to eight people.

Decide on the number of seats in both rows of seats to suit your needs. The V-Class can be configured for up to an eight seater option. And for those special preferences regarding comfort there is a 3-passenger bench seat available in combination with the unique luxury seats with massage, climate control and reclining functions.

## An exciting presence.

No matter whether you view it from the front, side or rear, from the very first glance it's clear: the V-Class has an excellent command of the Mercedes-Benz design idiom. Its expressive exterior design results from the interplay of striking lines and large, smooth surfaces. This contemporary Mercedes-Benz design idiom brings out the poise and assurance of the V-Class's look in an impressive way. The striking exterior can be further individualised on request: for instance with the Night Package, with AMG Line, with the AMG spoiler lip and a large range of attractive light-alloy wheels.

## A model of safety.

Being on the road with the V-Class is a true pleasure. However, there are many traffic situations where support can be helpful and welcome. That's why there is a broad range of assistance systems available for the V-Class, which can reduce the burden on the driver and provide support in critical situations – on motorways and country roads as well as in urban traffic.

## V-Class.

Even at first glance it's clear: the V-Class has an excellent command of the Mercedes-Benz design idiom. Available with 43.2 cm (17") 5-twin-spoke light alloy with Tyre pressure monitor & 9G-TRONIC transmission. Equipped with a 7-seater configuration with cruise control and ATTENTION ASSIST. Only available in V220d and V250d

## AVANTGARDE.

A variety of functional and visually attractive features increases the sportiness and exclusivity of the V-Class AVANTGARDE. The exterior is refined by the 48.3 cm (19") light-alloy wheels, high-quality LED intelligent light system head-lamps and bi-colour tail lamps, as well as the waistline trim strip and the chrome trim at the rear. Both V220d, V250d and V300d are available in the Avantgarde trim.

## EXCLUSIVE.

The V-Class EXCLUSIVE excitingly reinterprets luxury: it combines refined design features with luxurious equipment. The panoramic sunroof creates a generous, luminous ambience. Convenient highlights also include the large centre console with refrigerated compartment and the thermal cup holders. Only V300d is equipped with the Exclusive trim.

## Special EDITION.

Available exclusively to the South African market and limited in supply, the Special EDITION comes in three paint colours, including an exclusive Sodalite Blue Metallic. Additionally, black trimmings around the vehicle give it a sleek and sophisticated allure. The Special EDITION comes complete with an eye-catching roof box from the AMG range, giving it an undeniable presence on the road.

## Aerodynamics Package.

With the new Aerodynamic Package, you save fuel and thus protect the environment thanks to lower CO2 emissions. At the same time, the design of the rear bumper underscores the striking appearance of your Mercedes.

## Panoramic sliding sunroof.

The high-quality panoramic sliding sunroof with its large glass areas allows a great deal of light into the interior, giving it a bright, welcoming feel-good atmosphere. The sliding roof in the front section can be opened electrically for additional ventilation. A two-piece electric roller blind provides convenient sun protection. The panoramic sliding sunroof measures 1900 mm x 1120 mm and has a glass surface area of more than 2 m<sup>2</sup>.

## Ambient lighting, cockpit.

The ambient lighting in the cockpit welcomes the driver and front passenger with pleasant, indirect light. Depending on the desired lighting mood, the three colour shades “neutral”, “solar” and “polar” create a stylish feel-good atmosphere. The brightness can also be adjusted in five levels.

## Luxury seat.

Relax, recover, feel good: the luxury seat indulges the rear passenger with exceptional comfort. Thanks to individually adjustable massage, seat climatisation and reclining functions, hardly any comfort wishes remain unfulfilled.

## Comfort driver's seat.

The comfort driver's seat can adequately accommodate persons of virtually any stature and physique and enable a comfortable seating position for long journeys. To this end, the seat can be manually adjusted in eight ways: fore/aft adjustment for the correct distance of the driver's legs to the pedals and seat height and also seat backrest and seat cushion angle adjustment for a comfortable driving position. Furthermore, the head restraint can be set by height and inclination according to the body size and comfort requirements of the driver. A further plus in comfort is offered by the armrest on the side facing the front passenger.

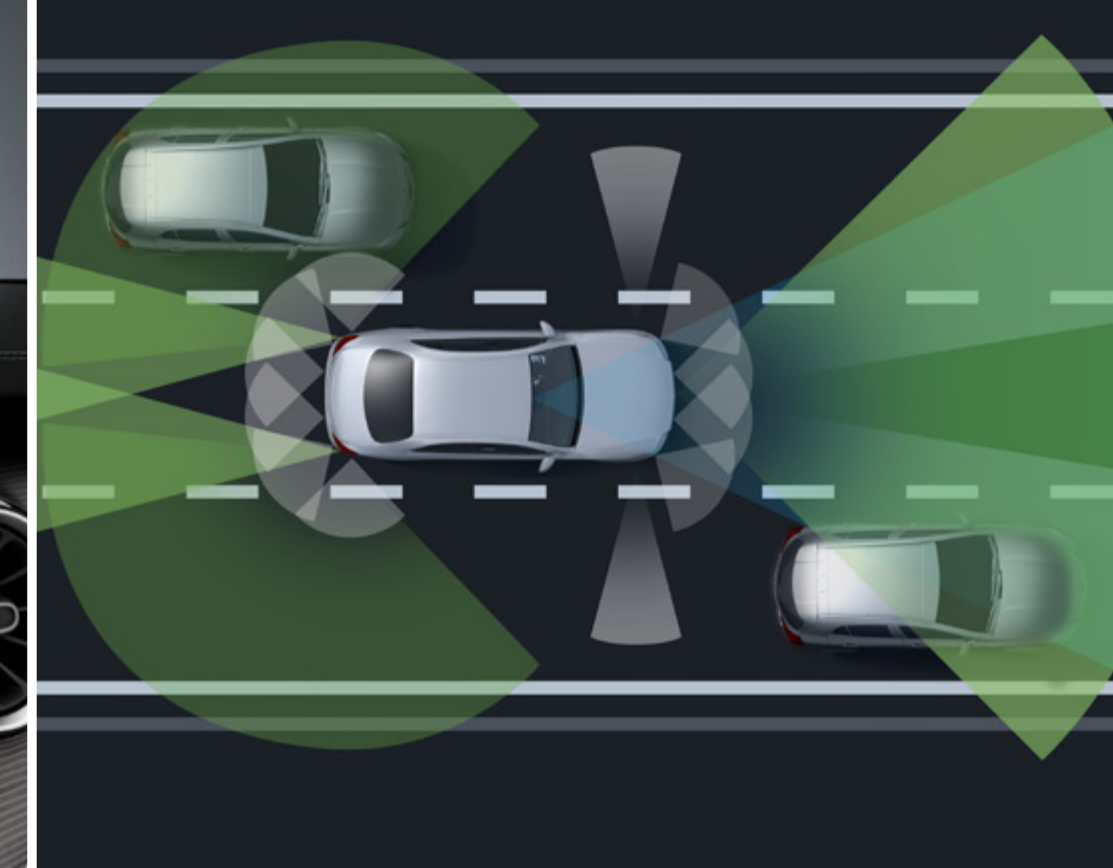

## EASY-PACK tailgate.

The EASY-PACK tailgate can be opened and closed electrically at the touch of a button and this makes it easy to load and unload the load compartment. It is activated simply and practically via the button on the vehicle key or release handle on the tailgate.

## 360° camera.

The 360-degree camera significantly improves visibility when parking and manoeuvring. Using 4 close-range cameras, it shows images of the vehicle's immediate surroundings in the media display. Different views are available: the area in front of, to the side of and behind the vehicle, as well as a zoom function that makes hitching up trailers easier. What's more, the entire vehicle can be shown in the display in a virtual bird's-eye view.

## Driving Assistance package.

The Driving Assistance package is an intelligent combination of 4 assistance systems which take the strain off the driver and ensure driving is safer. For example they can help the driver to maintain a minimum distance from the vehicle ahead, and to be aware of any vehicle in the driver's blind spot so as not to inadvertently move out of the lane the vehicle is in. In critical situations they can help to prevent accidents or at least lessen their impact. Here the anticipatory occupant protection system PRE-SAFE® can detect critical driving situations at an early stage and initiate preventive protection measures.

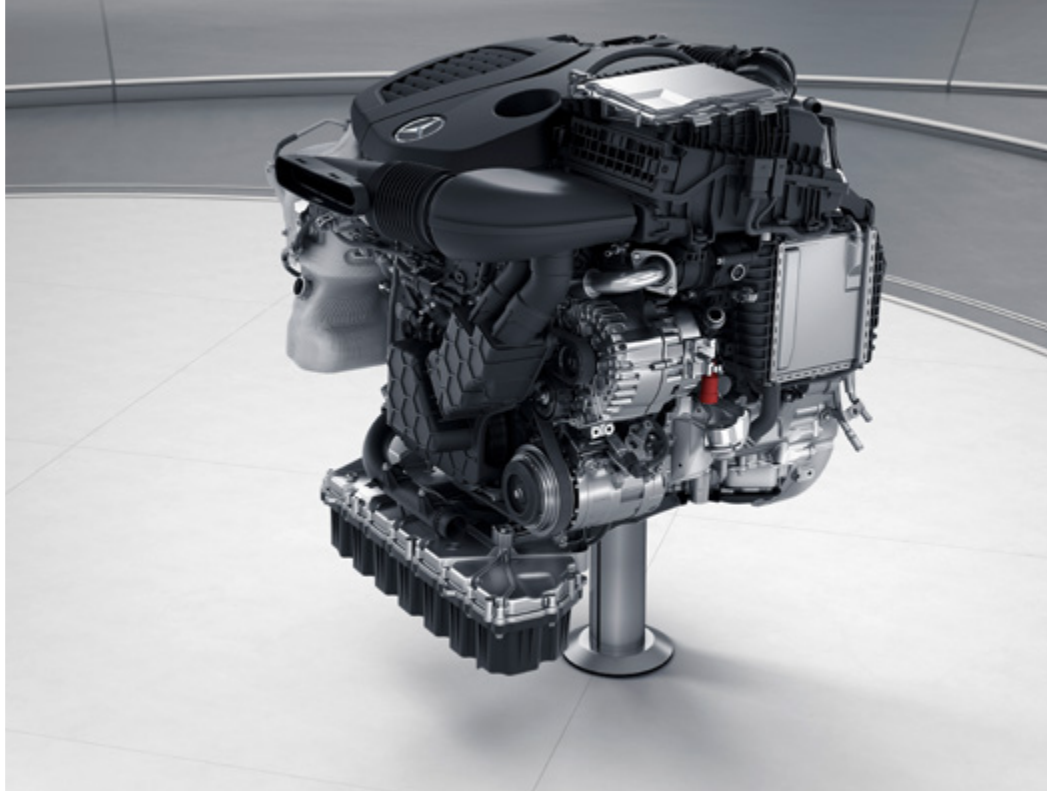

## Anti-Theft Protection Package.

URBAN GUARD vehicle protection combines a variety of safety features that increase the security for your vehicle and your valuables inside it. It gives both an acoustic and a visual warning signal if it detects a break-in or theft.

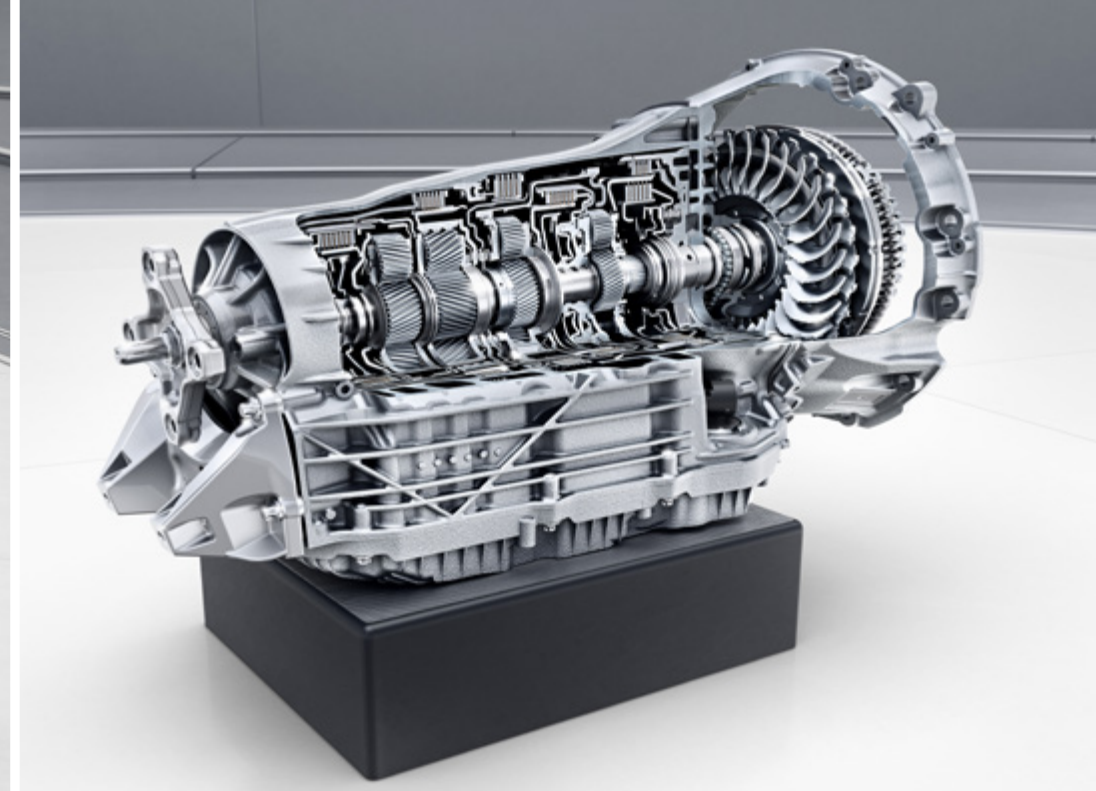

## Illuminated table on Backrest.

The new, illuminated folding tables with a chrome frame and illuminated trim elements to match the selected vehicle equipment on the backrest of the driver's and co-driver's seats increase travel comfort for your passengers – day and night. They also underscore the luxurious ambience of your vehicle's rear passenger compartment

## OM 654 DE 20 LA engine, 174 kW (237 hp).

The OM 654 4-cylinder diesel engine, rated at 174 kW (237 hp), delights on every journey with its extremely dynamic power delivery and exemplary efficiency as well as its low noise and vibration levels. The engine already delivers its maximum torque of 500 Nm at between 1600 and 2400 rpm. This is achieved, among other things, by the use of common rail direct injection with piezo injectors and two-stage exhaust-gas turbocharging. Overtorque technology even delivers additional torque briefly, when overtaking for example. Thanks to a modern exhaust gas aftertreatment system using an SCR catalytic converter (Selective Catalytic Reduction) and AdBlue® injection, the engine fulfils the requirements of the Euro 6d emissions class.

## 9G-TRONIC.

The 9G-TRONIC automatic transmission has nine gears which keep the engine speed as low as possible in every driving situation. The large spread of the transmission brings added agility and pulling power in almost all driving situations and improves the pulling away capability. The vibration dampers of the converter allow driving at low engine speeds and thereby help to save fuel. The strongly pronounced overdrive characteristics of the transmission contribute to keeping the engine speeds and therefore the fuel consumption low in real-life operations and at high speeds.

Interior Trims & Wheels.

AMG carbon-fibre-look trim (FB1)

Dashboard in leather look with topstitching (FH6)
